AADYA DIXIT

Ghaziabad, India | +91-9315808067 | E-mail | LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Full-stack development professional with a strong foundation in MERN stack technologies, backend engineering, and database management, complemented by hands-on knowledge of Microsoft Azure, Terraform, Docker, Kubernetes, and Azure DevOps. Familiar with REST APIs, Infrastructure as Code (IaC), CI/CD pipelines, cloud infrastructure, and DevSecOps practices, focusing on scalable application development and deployment automation.

EDUCATION

IMS Engineering College (AKTU) | Ghaziabad, India
Bachelor of Technology in Computer Science; CGPA: 7.10/10 2023 – 2027 (Expected)
Senior Secondary Education (Class XII Dual-Track) | Sahibabad, India
National Institute of Open Schooling (NIOS): **PCM (Physics, Chemistry, Mathematics) – 85%**
St. Mary's Christian School (CBSE): **PCB (Physics, Chemistry, Biology) – 75%**
St. Mary's Christian School (CBSE) | Sahibabad, India
Secondary School (Class X) – 70%

TECHNICAL SKILLS

- **Languages & Scripting:** JavaScript, Python, C++, SQL, Bash, HTML5, CSS3
- **Web Development:** React.js, Node.js, Express.js, Django, Flask, FastAPI, REST APIs, Bootstrap
- **Databases:** MongoDB, MySQL, PostgreSQL, Database Design, Data Modelling
- **Cloud & Infrastructure:** Microsoft Azure, Azure Networking, Microsoft Entra ID, Azure App Service, AWS (S3/EC2), Terraform (IaC)
- **DevOps & CI/CD:** Azure DevOps, YAML & Classic Pipelines, Git, GitHub, Azure Repos, Docker, Kubernetes, Helm, Argo CD
- **DevSecOps, Monitoring & AI:** TFLint, tfsec, Terrascan, Terratest, Azure Monitor, Prometheus, Grafana, Azure Policy, Agentic AI, LangChain, OpenAI API

EXPERIENCE

Full Stack Engineer Intern | Nayoda *June 2026 – July 2026*
- Contributed to full-stack application development, focusing on JavaScript functionality, frontend components, and application architecture.
- Collaborated within an Agile workflow and gained exposure to code reviews, Git version control, continuous delivery concepts, and cloud deployment workflows.

Full Stack Web Developer (MERN) Intern | Skill Nexis *July 2026 – August 2026*
- Developed responsive web applications features using MongoDB, Express.js, React.js, and Node.js focusing on frontend components and backend REST APIs
- Implemented user authentication, client-side routing, and database integration while following Git-based version control practices.

PROJECTS

SkillSphere | Full Stack Developer & DevOps | GitHub
- Developed a full-stack web application with frontend and backend integration, focusing on application workflows, API communication, and database-driven functionality.
- Implemented Docker-based containerization and CI/CD automation to streamline application builds, testing, and deployment.

AssetFlow | Full Stack Developer & DevOps | GitHub
- Developed a full-stack asset management application using React.js, Node.js, Express.js, and SQLite, implementing REST APIs and database operations.
- Automated infrastructure provisioning using Terraform and integrated Azure DevOps pipelines with validation and approval stages to support consistent, controlled application deployments.

CERTIFICATIONS

- **SDGI Hackathon**- Organized by Sunderdeep Global University | March-2026- Certificate
- **Hack-a-Thon Techfest**- Coordinated by IMSUC, Ghaziabad | April-2026- Certificate
